

Clifford Chun-Fai Wong Prize in Housing Design

This award is for the best project on multi-family or multi-unit housing design. The Clifford Chun-Fai Wong Prize in Housing Design was established in 1995 by Professor Nelson Chen to honor his late partner and father-in-law. This prize was created to “help re-establish the essential role of architects in society to provide not only the fundamental needs of human shelter but to meet the challenge of designing creative solutions for improving living environments.” A parallel prize has been awarded at the Harvard Design School since 1990.

Clifford Chun-Fai Wong (1932-87) was an architect and property developer best known for his dedication to providing affordable, low-rise alternatives. Fairview Park and Hong Lok Yuen Estates, both in the New Territories, are leading examples of his professional achievement and personal commitment in the field of residential community development.

Eligibility

Current Year 2- 4 BSSc Architectural Studies students, MArch 1 and MArch 2 students with a project that has its primary focus on multi-family or multi-unit housing design.

Award

HK\$10,000 and certificate. Honourable mentions may also be awarded.

Procedures

Complete and submit the application form with design statement (max. 250 words) and transcript to Miss Meiling Lo of the General Office before the deadline. Application form can be downloaded from the Scholarships webpage of the School. Applicants may submit both presentation boards and models. Detailed arrangement will be announced in due course. The Design Jury meeting will be held after the final reviews in Term 2. Award presentation will be held in the opening ceremony of the Master of Architecture Graduation Show.

Application Deadline

30 April 2015 (Thursday)
