

Some issues related to SB raised at SB11

Friday, 11 November 2011

7:15 pm – 8:30 pm

The Auditorium, Ground Floor, Jockey Club Environmental Building
77 Tat Chee Avenue, Kowloon Tong, Hong Kong

The recently held Sustainable Building SB11 World Conference (SB11) in Helsinki, from 18 to 21 October 2011, brought home a lot of new and exciting development in planning, designing, developing, assessing and operating sustainable buildings. Various national green building assessment and rating systems are now incorporating features and assessment aspects related not only to individual buildings but also into community-related or regional-related ones as well. These world trends together with the presentations and displays during the Conference and the associated Exhibitions of the best sustainable buildings of different types and categories in various countries have certainly stimulated the insight and development of future sustainable building standards around the world.

World Sustainable Building Conference 2011

Nils Larsson
Executive Director

International Initiative for a Sustainable Built Environment (iiSBE)

Nils Larsson is an architect and is Executive Director of the International Initiative for a Sustainable Built Environment (iiSBE). As part of his work with the Government of Canada during the 1990's, he developed and managed a demonstration program for high-performance buildings. He is the main organizer of the SB-series of international conferences and of Sustainable Building Challenge (SBC), an international project to showcase high performance buildings. He is also a principal developer of the SBTool, a system for assessing the sustainability performance of buildings that is adaptable to many different regions.

Programme

06:45 pm – 07:15 pm Registration (light refreshment will be provided)

Registration

Deadline 10 November 2011 NOON

<http://www.hkgbc.org.hk/eng/events/sb11sb11.aspx>
